SKILLS & TOOLS

Product & AI Skills: Product Strategy, Product Development, Quantitative and Qualitative Data Analysis, Retrieval-Augmented Generation (RAG), Embeddings, Model Deployment (AWS/Vercel/Render), LLM API Integration, LangChain Orchestration, LLM-Powered Voice Agents

Web: JavaScript/TypeScript, React, Next.js, Tailwind, HTML/CSS

Backend/DB: Node.js, Python, Express, FastAPI, MongoDB, MySQL, GraphQL

Embedded Systems: C & C++, Python, MATLAB, Linux, ROS/ROS2, Arduino, Raspberry Pi, I2C, I2S

Product Management Tools: PowerBI, Tableau, Amplitude, SurveyMonkey, Posthog/Google Analytics, Figma, Userdoc

AI/ML & tools: Docker, Redis, PyTorch, TensorFlow, Hugging Face Transformers, Pinecone, Deepgram, 11labs, Vapi

EDUCATION

New Jersey Institute of Technology (NJIT)

Newark, NJ

B.S. Electrical and Computer Engineering

December 2025

EXPERIENCE

[Boltzman AI](#) (Voice agents Startup)

San Francisco, CA

Founder & Technical Product Manager

May 2025 - December 2025

- Built a voice AI platform processing **18,000+ monthly** calls across 30+ restaurants, reducing staff time 30+ hours weekly
- Scaled to 30 restaurants in 2 months, processing **\$50,000+** monthly orders at **\$60,000 ARR**
- Owned POS integration strategy (Square, Clover, OpenTable), reducing order errors 40% via real-time menu sync

[Lawnstack](#) (Home services Startup)

Newark, NJ

Co-founder & Head Of Product

January 2024 - December 2024

- Co-founded and scaled outdoor services platform to **500+ services** and **\$80K GMV**; raised **\$150K** from [Alchemist](#)
- Recruited and led team of 8 (MIT, Cornell, Harvard, Wharton, Georgia Tech); launched MVP in 7 weeks
- Secured additional backing from angels and received **\$850k** in tool credits

PROJECTS

[Corner](#) (Contract management and eSignature) - TypeScript, MongoDB, Node.js, React

- Architected a DocuSign-style platform for founders to draft, review, clause-flag, collaborate and sign contracts
- Integrated Reducto AI to auto-locate signature fields, improving marker accuracy by 35%.
- Implemented real-time collaboration with shared LLM chats, presence, and inline comments.

[Cogito](#) (Voice AI Companion for dementia) - Python, TypeScript, Raspberry Pi 4

- Led team of 3 to build **Voice AI companion** for cognitive impairment seniors via FM radio with **95%+ accuracy**
- Owned end-to-end product design and full-stack engineering across firmware, hardware and web app
- Delivered prototype under **\$400 budget** through user research with 20+ seniors and caregivers

[Korah AI/Boltzman Engine](#) (Universal AI Agent)

- Co-built a universal agent that utilises tools, context, and integrations to route tasks to optimal LLMs (e.g., DeepSeek, Claude) for autonomous execution. Reached 3K users in 2 weeks
- Integrated Slack, Notion, and Google Drive to enable RAG-based data retrieval and direct action execution.
- Enhanced research integrity by implementing mandatory source citation, an integrated Canvas, and contextual threads
